

The client is responsible for providing:

- A certified and experienced acrobatic rigger for the installation and verification of the rigging equipment.
- A minimum height of 7.31 meters or 24 feet
- A double rigging point where each point has a minimum working load of 750kg / 1654lbs.
- An acrobatic crash mat that matches the description provided in the diagram at minimum.
- A minimum of 1.5 meters of open space on each side of the mat.
- A sound system.
- A dressing room with mirrors, heating and decent lighting.
- A locker/lockable space (either the dressing room or a small locker/lock box) for personal belongings.
- Access to our apparatus and a warm up area one hour before the performance.
- A rehearsal period with lighting.

The artists will provide:

- The tissues
- Makeup
- Costumes
- Music in the form of MP3 File, USB or CD

Additionally:

- The artists reserve the right to inspect the equipment/installation and communicate directly with the rigger(s).
- The duration of this number is 7 minutes

It is to be noted that these requirements are for a standard performance. For our épreuve there may be additional lighting and floor space requirements. Additionally, a standard performance can be adapted in terms of duration, height, rigging width, music and style upon a customer's request. We would be happy to discuss what's possible under different conditions. Please feel free to contact us at sydney.brianna@duotissu.com to discuss any questions, concerns or inquiries.
